# About me

My experience - 12+ years

Besides editing I'm color grading and working with lower thirds, compose and keying in AE.

During all time I had already worked for various commercials of major brands, few independent feature and short films, participated at Biennale and Venice International Film Festival. I also have big experience working with international teams, with european and american directors and DOP's.

**Soft:** Adobe Premiere Pro, DaVinci Resolve, After Effects, Illustrator, Photoshop. I also was working with Final Cut 7/X and Qtake. Now learning Avid.

I have my own equipment allowing me editing 2K/4K/5K from ARRI/RED/Blackmagic and others in real-time.

**A bit extra info:** English language – Advanced (speaking/reading/writing), driving license and individual entrepreneur. Instead of editing at post production, I have great experience of editing on set and also working as DIT.

I like all types in editing, but in each project i'm looking for new and non-standard decisions, ability to realize my creativity and try something curious and brand new.

Most of all I like edit commercial tv ads, brand videos, music videos, feature films and documentaries.
